KRIT1 Pre-design Chimera RNAi

Catalog # : H00000889-R04

規格 : [10 nmol] [20 nmol]

List All

Specification

Product Description:	Homo sapiens KRIT1, ankyrin repeat containing (KRIT1), transcript variant 4, mRNA.
Reactivity:	Human
Supplied Product:	DEPC water
Target Refseq:	NM_194455
Target Region:	Coding sequence
Storage Instruction:	Store at -20°C, do not exceed 4 - 5 freeze-thaw cycles to ensure product integrity.
Note:	Position of the Chimera RNAi. The related RNAi products listed below were designed from different accession number but sharing the same RNAi sequence.

Application Image

RNAi Knockdown

Applications

RNAi Knockdown

Gene Information

Entrez GeneID: [889](#)

Gene Name: KRIT1

Gene Alias: CAM,CCM1

Gene Description: KRIT1, ankyrin repeat containing

Omim ID: [116860](#), [604214](#)

Gene Ontology: [Hyperlink](#)

Gene Summary: This gene encodes a protein containing four ankyrin repeats, a band 4.1/ezrin/radixin/moesin (FERM) domain, and multiple NPXY sequences. The encoded protein is localized in the nucleus and cytoplasm. It binds to integrin cytoplasmic domain-associated protein-1 alpha (ICAP1alpha), and plays a critical role in beta1-integrin-mediated cell proliferation. It associates with junction proteins and RAS-related protein 1A (Rap1A), which requires the encoded protein for maintaining the integrity of endothelial junctions. It is also a microtubule-associated protein and may play a role in microtubule targeting. Mutations in this gene result in cerebral cavernous malformations. Multiple alternatively spliced transcript variants have been found for this gene. [provided by RefSeq]

Other Designations: ankyrin repeat-containing protein Krit1,cerebral cavernous malformations 1,krev interaction trapped 1
