Gene Information

Entrez GeneID: [930](#)

Gene Name: CD19

Gene Alias: B4,MGC12802

Gene Description: CD19 molecule

Omim ID: [107265](#)

Gene Ontology: [Hyperlink](#)

Gene Summary: Lymphocytes proliferate and differentiate in response to various

concentrations of different antigens. The ability of the B cell to respond in a specific, yet sensitive manner to the various antigens is achieved with the use of low-affinity antigen receptors. This gene encodes a cell surface molecule which assembles with the antigen receptor of B lymphocytes in order to decrease the threshold for antigen receptor-dependent stimulation. [provided by RefSeq]

Other Designations: B-lymphocyte antigen CD19,CD19 antigen
