CIDEA Pre-design Chimera RNAi

Catalog # : H00001149-R02

規格 : [10 nmol] [20 nmol]

List All

Specification

Product Description: Homo sapiens cell death-inducing DFFA-like effector a (CIDEA), transcript variant 2, mRNA.

Reactivity: Human

Supplied Product: DEPC water

Target Refseq: NM_198289

Storage Instruction: Store at -20°C, do not exceed 4 - 5 freeze-thaw cycles to ensure product integrity.

Note: Position of the Chimera RNAi.

Application Image

RNAi Knockdown

Applications

RNAi Knockdown

Gene Information

Entrez GeneID: 1149

Gene Name: CIDEA

Gene Alias: CIDE-A

Gene cell death-inducing DFFA-like effector a

Description:

Omim ID: [604440](#)

Gene Ontology: [Hyperlink](#)

Gene Summary: This gene encodes the homolog of the mouse protein Cidea that has been shown to activate apoptosis. This activation of apoptosis is inhibited by the DNA fragmentation factor DFF45 but not by caspase inhibitors. Mice that lack functional Cidea have higher metabolic rates, higher lipolysis in brown adipose tissue and higher core body temperatures when subjected to cold. These mice are also resistant to diet-induced obesity and diabetes. This suggests that in mice this gene product plays a role in thermogenesis and lipolysis. Two alternative transcripts encoding different isoforms have been identified. [provided by RefSeq]
