### Gene Information

Entrez GeneID: [1441](#)

**Gene Name:** CSF3R

**Gene Alias:** CD114,GCSFR

**Gene Description:** colony stimulating factor 3 receptor (granulocyte)

**Omim ID:** [138971](#)

**Gene Ontology:** [Hyperlink](#)

**Gene Summary:** The protein encoded by this gene is the receptor for colony stimulating factor 3, a cytokine that controls the production, differentiation, and function of granulocytes. The encoded protein, which is a member of the family of cytokine receptors, may also function in some cell surface adhesion or recognition processes. Four transcript variants encoding four different isoforms have been found for this gene, with three of the isoforms being membrane-bound and the other being secreted and soluble. Mutations in this gene are a cause of Kostmann syndrome, also known as severe congenital neutropenia. [provided by RefSeq]
