CSTB Pre-design Chimera RNAi

Catalog # : H00001476-R01

規格 : [10 nmol] [20 nmol]

List All

Specification

Product Homo sapiens cystatin B (stefin B) (CSTB), mRNA.

Description:

Reactivity: Human

Supplied Product: DEPC water

Target Refseq: NM_000100

Storage Instruction: Store at -20°C, do not exceed 4 - 5 freeze-thaw cycles to ensure product integrity.

Note: Position of the Chimera RNAi.

Application Image

RNAi Knockdown

Applications

RNAi Knockdown

Gene Information

Entrez GeneID: [1476](#)

Gene Name: CSTB

Gene Alias: CST6,EPM1,PME,STFB

Gene cystatin B (stefin B)

Description:

Omim ID: [254800](#), [601145](#)

Gene Ontology: [Hyperlink](#)

Gene Summary: The cystatin superfamily encompasses proteins that contain multiple cystatin-like sequences. Some of the members are active cysteine protease inhibitors, while others have lost or perhaps never acquired this inhibitory activity. There are three inhibitory families in the superfamily, including the type 1 cystatins (stefins), type 2 cystatins and kininogens. This gene encodes a stefin that functions as an intracellular thiol protease inhibitor. The protein is able to form a dimer stabilized by noncovalent forces, inhibiting papain and cathepsins I, h and b. The protein is thought to play a role in protecting against the proteases leaking from lysosomes. Evidence indicates that mutations in this gene are responsible for the primary defects in patients with progressive myoclonic epilepsy (EPM1). [provided by RefSeq]

Other Designations: CPI-B,cystatin B,liver thiol proteinase inhibitor,stefin B
