DAD1 Pre-design Chimera RNAi

Catalog # : H00001603-R01

規格 : [10 nmol] [20 nmol]

List All

Specification

Product Description: Homo sapiens defender against cell death 1 (DAD1), mRNA.

Reactivity: Human

Supplied Product: DEPC water

Target Refseq: NM_001344

Storage Instruction: Store at -20°C, do not exceed 4 - 5 freeze-thaw cycles to ensure product integrity.

Note: Position of the Chimera RNAi.

Application Image

RNAi Knockdown

Applications

RNAi Knockdown

Gene Information

Entrez GeneID: [1603](#)

Gene Name: DAD1

Gene Alias: OST2

Gene defender against cell death 1

Description:

Omim ID: [600243](#)

Gene Ontology: [Hyperlink](#)

Gene Summary: DAD1, the defender against apoptotic cell death, was initially identified as a negative regulator of programmed cell death in the temperature sensitive tsBN7 cell line. The DAD1 protein disappeared in temperature-sensitive cells following a shift to the nonpermissive temperature, suggesting that loss of the DAD1 protein triggered apoptosis. DAD1 is believed to be a tightly associated subunit of oligosaccharyltransferase both in the intact membrane and in the purified enzyme, thus reflecting the essential nature of N-linked glycosylation in eukaryotes. [provided by RefSeq]
