DAZ1 Pre-design Chimera RNAi

Catalog # : H00001617-R01

規格 : [10 nmol] [20 nmol]

List All

Specification

Product Homo sapiens deleted in azoospermia 1 (DAZ1), mRNA.

Description:

Reactivity: Human

Supplied DEPC water

Product:

Target Refseq: NM_004081

Storage Store at -20°C, do not exceed 4 - 5 freeze-thaw cycles to ensure
Instruction: product integrity.

Note: Position of the Chimera RNAi.

Application Image

RNAi Knockdown

Applications

RNAi Knockdown

Gene Information

Entrez GeneID: [1617](#)

Gene Name: DAZ1

Gene Alias: DAZ,SPGY

Gene deleted in azoospermia 1

Description:

Omim ID: [400003](#)

Gene Ontology: [Hyperlink](#)

Gene Summary: This gene is a member of the DAZ gene family and is a candidate for the human Y-chromosomal azoospermia factor (AZF). Its expression is restricted to premeiotic germ cells, particularly in spermatogonia. It encodes an RNA-binding protein that is important for spermatogenesis. Four copies of this gene are found on chromosome Y within palindromic duplications; one pair of genes is part of the P2 palindrome and the second pair is part of the P1 palindrome. Each gene contains a 2.4 kb repeat including a 72-bp exon, called the DAZ repeat; the number of DAZ repeats is variable and there are several variations in the sequence of the DAZ repeat. Each copy of the gene also contains a 10.8 kb region that may be amplified; this region includes five exons that encode an RNA recognition motif (RRM) domain. This gene contains three copies of the 10.8 kb repeat. However, no transcripts containing three copies of the RRM domain have been described; thus the RefSeq for this gene contains only two RRM domains. [provided by RefSeq]

Other deleted in azoospermia
