DCX Pre-design Chimera RNAi

Catalog # : H00001641-R04

規格 : [10 nmol] [20 nmol]

List All

Specification

Product Description: Homo sapiens RNA, U21 small nucleolar (RNU21) on chromosome 1.

Reactivity: Human

Supplied Product: DEPC water

Target Refseq: NM_178151

Storage Instruction: Store at -20°C, do not exceed 4 - 5 freeze-thaw cycles to ensure product integrity.

Note: Position of the Chimera RNAi.

Application Image

RNAi Knockdown

Applications

RNAi Knockdown

Gene Information

Entrez GeneID: [1641](#)

Gene Name: DCX

Gene Alias: DBCN,DC,LISX,SCLH,XLIS

Gene doublecortin

Description:

Omim ID: [300067](#), [300121](#)

Gene Ontology: [Hyperlink](#)

Gene Summary: In the developing cortex, cortical neurons must migrate over long distances to reach the site of their final differentiation. The protein encoded by this gene is a cytoplasmic protein which appears to direct neuronal migration by regulating the organization and stability of microtubules. The encoded protein contains two doublecortin domains, which bind microtubules. In addition, the encoded protein interacts with LIS1, the regulatory gamma subunit of platelet activating factor acetylhydrolase, and this interaction is important to proper microtubule function in the developing cortex. Mutations in this gene are a cause of X-linked lissencephaly. Multiple transcript variants encoding at least three different isoforms have been found for this gene. [provided by RefSeq]

Other Designations: OTTHUMP00000062892,doublecortex,doublin,lissencephalin-X
