DTNA 293T Cell Transient Overexpression Lysate(Denatured)

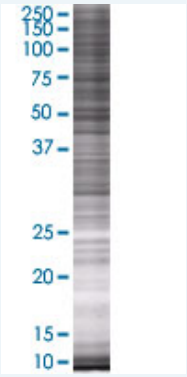
Catalog # : H00001837-T01 **規格 :** [100 uL]

List All

Specification

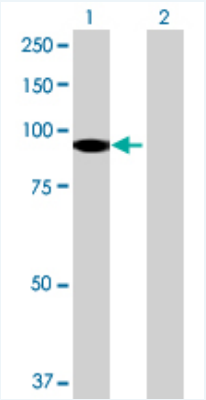
Transfected Cell Line:	293T
Plasmid:	pCMV-DTNA full-length
Host:	Human
Theoretical MW (kDa):	75.57
Quality Control Testing:	Transient overexpression cell lysate was tested with Anti-DTNA antibody (H00001837-B02) by Western Blots.

SDS-PAGE Gel



DTNA transfected lysate.

Western Blot



Lane 1: DTNA transfected lysate (75.57 KDa)
Lane 2: Non-transfected lysate.

Storage Buffer:	1X Sample Buffer (50 mM Tris-HCl, 2% SDS, 10% glycerol, 300 mM 2-mercaptoethanol, 0.01% Bromophenol blue)
Storage Instruction:	Store at -80°C. Aliquot to avoid repeated freezing and thawing.
MSDS:	Download

Gene Information

Entrez GeneID:	1837
GeneBank Accession#:	NM_032975.2
Protein Accession#:	NP_116757.2
Gene Name:	DTNA
Gene Alias:	D18S892E,DRP3,DTN,FLJ96209,LVNC1
Gene Description:	dystrobrevin, alpha
Omim ID:	601239, 604169, 606617
Gene Ontology:	Hyperlink
Gene Summary:	The protein encoded by this gene belongs to the dystrobrevin subfamily of the dystrophin family. This protein is a component of the dystrophin-associated protein complex (DPC), which consists of dystrophin and several integral and peripheral membrane proteins, including dystroglycans, sarcoglycans, syntrophins and alpha- and beta-dystrobrevin. The DPC localizes to the sarcolemma and its disruption is associated with various forms of muscular dystrophy. Mutations in this gene are associated with left ventricular noncompaction with congenital heart defects. Multiple alternatively spliced transcript variants encoding different isoforms have been identified for this gene. [provided by RefSeq
Other Designations:	OTTHUMP00000163154,OTTHUMP00000163155,dystrobrevin alpha,dystrophin-related protein 3
