E4F1 (Human) Matched Antibody Pair

Catalog # : H00001877-AP11

規格 : [1 Set]

[List All](#)

Specification

Product Description: This antibody pair set comes with matched antibody pair to detect and quantify protein level of human E4F1.

Reactivity: Human

Quality Control Testing: Standard curve using recombinant protein (H00001877-P01) as an analyte.

Sandwich ELISA detection sensitivity ranging from 1 ng/ml to 100 ng/ml.

Supplied Product: Antibody pair set content:
 1. Capture antibody: rabbit MaxPab® affinity purified polyclonal anti-E4F1 (100 ug)
 2. Detection antibody: mouse monoclonal anti-E4F1, IgG2a Kappa (20 ug)
 *Reagents are sufficient for at least 1-2 x 96 well plates using recommended protocols.

Storage Instruction: Store reagents of the antibody pair set at -20°C or lower. Please aliquot to avoid repeated freeze thaw cycle. Reagents should be returned to -20°C storage immediately after use.

Gene Information

Entrez GeneID: [1877](#)

Gene Name: E4F1

Gene Alias: E4F, MGC99614

Gene Description: E4F transcription factor 1

Omim ID: [603022](#)

Gene Ontology: [Hyperlink](#)

Gene Summary: The zinc finger protein encoded by this gene is one of several cellular transcription factors whose DNA-binding activities are regulated through the action of adenovirus E1A. A 50-kDa amino-terminal product is generated from the full-length protein through proteolytic cleavage. The protein is differentially regulated by E1A-induced phosphorylation. The full-length gene product represses transcription from the E4 promoter in the absence of E1A, while the 50-kDa form acts as a transcriptional activator in its presence. [provided by RefSeq]

Other Designations: p120E4F
