FANCG Pre-design Chimera RNAi

Catalog # : H00002189-R01

規格 : [10 nmol] [20 nmol]

List All

Specification

Product Description: Homo sapiens Fanconi anemia, complementation group G (FANCG), mRNA.

Reactivity: Human

Supplied Product: DEPC water

Target Refseq: NM_004629

Storage Instruction: Store at -20°C, do not exceed 4 - 5 freeze-thaw cycles to ensure product integrity.

Note: Position of the Chimera RNAi.

Application Image

RNAi Knockdown

Applications

RNAi Knockdown

Gene Information

Entrez GeneID: 2189

Gene Name: FANCG

Gene Alias: FAG, XRCC9

Gene Fanconi anemia, complementation group G

Description:

Omim ID: [602956](#)

Gene Ontology: [Hyperlink](#)

Gene Summary: The Fanconi anemia complementation group (FANC) currently includes FANCA, FANCB, FANCC, FANCD1 (also called BRCA2), FANCD2, FANCE, FANCF, FANCG, FANCI, FANCI (also called BRIP1), FANCL, FANCM and FANCN (also called PALB2). The previously defined group FANCH is the same as FANCA. Fanconi anemia is a genetically heterogeneous recessive disorder characterized by cytogenetic instability, hypersensitivity to DNA crosslinking agents, increased chromosomal breakage, and defective DNA repair. The members of the Fanconi anemia complementation group do not share sequence similarity; they are related by their assembly into a common nuclear protein complex. This gene encodes the protein for complementation group G. [provided by RefSeq]

Other Designations: DNA repair protein XRCC9, OTTHUMP00000021319, X-ray repair complementing defective repair in Chinese hamster cells 9, X-ray repair, complementing defective, in Chinese hamster, 9
