FAT Pre-design Chimera RNAi

Catalog # : H00002195-R01

規格 : [10 nmol] [20 nmol]

List All

Specification

Product Description: Homo sapiens FAT tumor suppressor homolog 1 (Drosophila) (FAT), mRNA.

Reactivity: Human

Supplied Product: DEPC water

Target Refseq: NM_005245

Storage Instruction: Store at -20°C, do not exceed 4 - 5 freeze-thaw cycles to ensure product integrity.

Note: Position of the Chimera RNAi.

Application Image

RNAi Knockdown

Applications

RNAi Knockdown

Gene Information

Entrez GeneID: 2195

Gene Name: FAT1

Gene Alias: CDHF7,FAT,ME5,hFat1

Gene FAT tumor suppressor homolog 1 (Drosophila)

Description:

Omim ID: [600976](#)

Gene Ontology: [Hyperlink](#)

Gene Summary: This gene is an ortholog of the Drosophila fat gene, which encodes a tumor suppressor essential for controlling cell proliferation during Drosophila development. The gene product is a member of the cadherin superfamily, a group of integral membrane proteins characterized by the presence of cadherin-type repeats. In addition to containing 34 tandem cadherin-type repeats, the gene product has five epidermal growth factor (EGF)-like repeats and one laminin A-G domain. This gene is expressed at high levels in a number of fetal epithelia. Its product probably functions as an adhesion molecule and/or signaling receptor, and is likely to be important in developmental processes and cell communication. Transcript variants derived from alternative splicing and/or alternative promoter usage exist, but they have not been fully described. [provided by RefSeq]

Other Designations: FAT tumor suppressor 1,cadherin ME5,cadherin family member 7,cadherin-related tumor suppressor
