## FCAR Pre-design Chimera RNAi

Catalog # : H00002204-R09

規格 : [ 10 nmol ] [ 20 nmol ]

List All

### Specification

**Product Description:** Homo sapiens Fc fragment of IgA, receptor for (FCAR), transcript variant 9, mRNA.

**Reactivity:** Human

**Supplied Product:** DEPC water

**Target Refseq:** NM\_133279

**Storage Instruction:** Store at -20°C, do not exceed 4 - 5 freeze-thaw cycles to ensure product integrity.

**Note:** Position of the Chimera RNAi.

### Application Image

RNAi Knockdown

### Applications

RNAi Knockdown

### Gene Information

**Entrez GeneID:** [2204](#)

**Gene Name:** FCAR

**Gene Alias:** CD89

**Gene** Fc fragment of IgA, receptor for  
**Description:**

**Omim ID:** [147045](#)

**Gene Ontology:** [Hyperlink](#)

**Gene Summary:** This gene is a member of the immunoglobulin gene superfamily and encodes a receptor for the Fc region of IgA. The receptor is a transmembrane glycoprotein present on the surface of myeloid lineage cells such as neutrophils, monocytes, macrophages, and eosinophils, where it mediates immunologic responses to pathogens. It interacts with IgA-opsonized targets and triggers several immunologic defense processes, including phagocytosis, antibody-dependent cell-mediated cytotoxicity, and stimulation of the release of inflammatory mediators. Multiple alternatively spliced transcript variants encoding different isoforms have been described for this gene. [provided by RefSeq]

**Other** Fc alpha receptor, IgA Fc  
**Designations:** receptor, OTTHUMP00000068692, OTTHUMP00000068696, OTTHUMP00000068697, OTTHUMP00000068698
