### Gene Information

**Entrez GeneID:** [2219](#)

**Gene Name:** FCN1

**Gene Alias:** FCNM

**Gene Description:** ficolin (collagen/fibrinogen domain containing) 1

**Omim ID:** [601252](#)

**Gene Ontology:** [Hyperlink](#)

**Gene Summary:** The ficolin family of proteins are characterized by the presence of a leader peptide, a short N-terminal segment, followed by a collagen-like region, and a C-terminal fibrinogen-like domain. The collagen-like and the fibrinogen-like domains are also found separately in other proteins such as complement protein C1q, C-type lectins known as collectins, and tenascins. However, all these proteins recognize different targets, and are functionally distinct. Ficolin 1 encoded by FCN1 is predominantly expressed in the peripheral blood leukocytes, and has been postulated to function as a plasma protein with elastin-binding activity. [provided by RefSeq]

**Other Designations:** OTTHUMP00000022519, ficolin (collagen/fibrinogen domain-containing) 1, ficolin 1
