Gene Information

Entrez GeneID: [2219](#)

Gene Name: FCN1

Gene Alias: FCNM

Gene ficolin (collagen/fibrinogen domain containing) 1

Description:

Omim ID: [601252](#)

Gene Ontology: [Hyperlink](#)

Gene Summary: The ficolin family of proteins are characterized by the presence of a leader peptide, a short N-terminal segment, followed by a collagen-like region, and a C-terminal fibrinogen-like domain. The collagen-like and the fibrinogen-like domains are also found separately in other proteins such as complement protein C1q, C-type lectins known as collectins, and tenascins. However, all these proteins recognize different targets, and are functionally distinct. Ficolin 1 encoded by FCN1 is predominantly expressed in the peripheral blood leukocytes, and has been postulated to function as a plasma protein with elastin-binding activity. [provided by RefSeq]

Other Designations: OTTHUMP00000022519, ficolin (collagen/fibrinogen domain-containing) 1, ficolin 1
