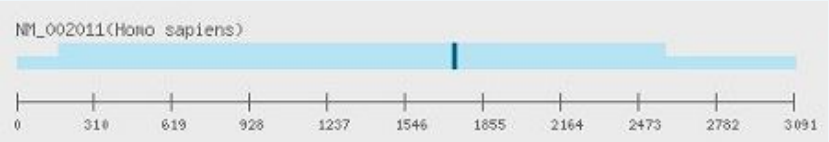
FGFR4 Pre-design Chimera RNAi

Catalog # : H00002264-R10 **規格 :** [10 nmol] [20 nmol]

List All

Specification

Product Description:	Homo sapiens fibroblast growth factor receptor 4 (FGFR4), transcript variant 1, mRNA.
Reactivity:	Human
Supplied Product:	DEPC water
Target Refseq:	NM_002011
Storage Instruction:	Store at -20°C, do not exceed 4 - 5 freeze-thaw cycles to ensure product integrity.
Note:	Position of the Chimera RNAi. The related RNAi products listed below were designed from different accesion number but sharing the same RNAi sequence.



Application Image

RNAi Knockdown

Applications

RNAi Knockdown

Gene Information

Entrez GeneID: 2264

Gene Name: FGFR4

Gene Alias:	CD334,JTK2,MGC20292,TKF
Gene Description:	fibroblast growth factor receptor 4
Omim ID:	134935
Gene Ontology:	Hyperlink
Gene Summary:	The protein encoded by this gene is a member of the fibroblast growth factor receptor family, where amino acid sequence is highly conserved between members and throughout evolution. FGFR family members differ from one another in their ligand affinities and tissue distribution. A full-length representative protein would consist of an extracellular region, composed of three immunoglobulin-like domains, a single hydrophobic membrane-spanning segment and a cytoplasmic tyrosine kinase domain. The extracellular portion of the protein interacts with fibroblast growth factors, setting in motion a cascade of downstream signals, ultimately influencing mitogenesis and differentiation. The genomic organization of this gene, compared to members 1-3, encompasses 18 exons rather than 19 or 20. Although alternative splicing has been observed, there is no evidence that the C-terminal half of the IgIII domain of this protein varies between three alternate forms, as indicated for members 1-3. This particular family member preferentially binds acidic fibroblast growth factor and, although its specific function is unknown, it is overexpressed in gynecological tumor samples, suggesting a role in breast and ovarian tumorigenesis. [provided by RefSeq
Other Designations:	OTTHUMP00000161430,hydroxyaryl-protein kinase,protein-tyrosine kinase,tyrosine kinase related to fibroblast growth factor receptor,tyrosylprotein kinase
