GSTA1 Pre-design Chimera RNAi

Catalog # : H00002938-R01

規格 : [10 nmol] [20 nmol]

List All

Specification

Product Description: Homo sapiens glutathione S-transferase A1 (GSTA1), mRNA.

Reactivity: Human

Supplied Product: DEPC water

Target Refseq: NM_145740

Storage Instruction: Store at -20°C, do not exceed 4 - 5 freeze-thaw cycles to ensure product integrity.

Note: Position of the Chimera RNAi.

Application Image

RNAi Knockdown

Applications

RNAi Knockdown

Gene Information

Entrez GeneID: [2938](#)

Gene Name: GSTA1

Gene Alias: GST2,GSTA1-1,GTH1,MGC131939

Gene glutathione S-transferase alpha 1

Description:

Omim ID: [138359](#)

Gene Ontology: [Hyperlink](#)

Gene Summary: Cytosolic and membrane-bound forms of glutathione S-transferase are encoded by two distinct supergene families. These enzymes function in the detoxification of electrophilic compounds, including carcinogens, therapeutic drugs, environmental toxins and products of oxidative stress, by conjugation with glutathione. The genes encoding these enzymes are known to be highly polymorphic. These genetic variations can change an individual's susceptibility to carcinogens and toxins as well as affect the toxicity and efficacy of some drugs. At present, eight distinct classes of the soluble cytoplasmic mammalian glutathione S-transferases have been identified: alpha, kappa, mu, omega, pi, sigma, theta and zeta. This gene encodes a glutathione S-transferase belonging to the alpha class. The alpha class genes, located in a cluster mapped to chromosome 6, are the most abundantly expressed glutathione S-transferases in liver. In addition to metabolizing bilirubin and certain anti-cancer drugs in the liver, the alpha class of these enzymes exhibit glutathione peroxidase activity thereby protecting the cells from reactive oxygen species and the products of peroxidation. [provided by RefSeq]

Other Designations: GST, class alpha, 1,GST-epsilon,OTTHUMP00000016611,S-(hydroxyalkyl)glutathione lyase A1,glutathione S-alkyltransferase A1,glutathione S-aryltransferase A1,glutathione S-transferase 2,glutathione S-transferase A1,glutathione S-transferase Ha subunit 1
