## HFE Pre-design Chimera RNAi

Catalog # : H00003077-R06

規格 : [ 10 nmol ] [ 20 nmol ]

List All

### Specification

**Product Description:** Homo sapiens hemochromatosis (HFE), transcript variant 6, mRNA.

**Reactivity:** Human

**Supplied Product:** DEPC water

**Target Refseq:** NM\_139006

**Storage Instruction:** Store at -20°C, do not exceed 4 - 5 freeze-thaw cycles to ensure product integrity.

**Note:** Position of the Chimera RNAi.  
The related RNAi products listed below were designed from different accession number but sharing the same RNAi sequence.

### Application Image

RNAi Knockdown

### Publication Reference

- dsCheck: highly sensitive off-target search software for double-stranded RNA-mediated RNA interference.

### Applications

RNAi Knockdown

### Gene Information

**Entrez GeneID:** [3077](#)

**Gene Name:** HFE

**Gene Alias:** HFE1,HH,HLA-H,MGC103790,dJ221C16.10.1

**Gene Description:** hemochromatosis

**Omim ID:** [176200](#), [235200](#)

**Gene Ontology:** [Hyperlink](#)

**Gene Summary:** The protein encoded by this gene is a membrane protein that is similar to MHC class I-type proteins and associates with beta2-microglobulin (beta2M). It is thought that this protein functions to regulate iron absorption by regulating the interaction of the transferrin receptor with transferrin. The iron storage disorder, hereditary haemochromatosis, is a recessive genetic disorder that results from defects in this gene. At least nine alternatively spliced variants have been described for this gene. Additional variants have been found but their full-length nature has not been determined. [provided by RefSeq]

**Other Designations:** MHC class I-like protein HFE,hemochromatosis protein,hereditary hemochromatosis protein HLA-H
