Datasheet

LGALS3BP MaxPab rabbit polyclonal antibody (D01)

Catalog Number: H00003959-D01

Regulatory Status: For research use only (RUO)

Product Description: Rabbit polyclonal antibody raised against a full-length human LGALS3BP protein.

Immunogen: LGALS3BP (NP_005558.1, 1 a.a. ~ 585 a.a) full-length human protein.

Sequence:

Host: Rabbit

Reactivity: Human

Applications: IP, WB-Ti

(See our web site product page for detailed applications information)

Protocols: See our web site at

<http://www.abnova.com/support/protocols.asp> or product page for detailed protocols

Storage Buffer: No additive

Storage Instruction: Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.

Entrez GeneID: 3959

Gene Symbol: LGALS3BP

Gene Alias: 90K, BTBD17B, MAC-2-BP

Gene Summary: The galectins are a family of beta-galactoside-binding proteins implicated in modulating cell-cell and cell-matrix interactions. LGALS3BP has been found elevated in the serum of patients with cancer and in those infected by the human immunodeficiency virus (HIV). It appears to be implicated in immune response associated with natural killer (NK) and lymphokine-activated killer (LAK) cell cytotoxicity. Using fluorescence in situ hybridization the full length 90K cDNA has been localized to chromosome 17q25. The native protein binds specifically to a human macrophage-associated lectin known as Mac-2 and also binds galectin 1. [provided by RefSeq]
