LTBR (Human) Matched Antibody Pair

Catalog # : H00004055-AP41

規格 : [1 Set]

[List All](#)

Specification

Product Description: This antibody pair set comes with matched antibody pair to detect and quantify protein level of human LTBR.

Reactivity: Human

Quality Control Testing: Standard curve using mammalian expressed recombinant protein as an analyte.

Sandwich ELISA detection sensitivity ranging from 3 ng/ml to 100 ng/ml.

Supplied Product: Antibody pair set content:
 1. Capture antibody: mouse monoclonal anti-LTBR (100 ug)
 2. Detection antibody: biotinylated mouse monoclonal anti-LTBR, IgG1 Kappa (50 ug)
 *Reagents are sufficient for at least 3-5 x 96 well plates using recommended protocols.

Storage Instruction: Store reagents of the antibody pair set at -20°C or lower. Please aliquot to avoid repeated freeze thaw cycle. Reagents should be returned to -20°C storage immediately after use.

Gene Information

Entrez GeneID: [4055](#)

Gene Name: LTBR

Gene Alias: D12S370,LT-BETA-R,TNF-R-III,TNFCR,TNFR-RP,TNFR2-RP,TNFRSF3

Gene Description: lymphotoxin beta receptor (TNFR superfamily, member 3)

Omim ID: [600979](#)

Gene Ontology: [Hyperlink](#)

Gene Summary: The protein encoded by this gene is a member of the tumor necrosis factor (TNF) family of receptors. It is expressed on the surface of most cell types, including cells of epithelial and myeloid lineages, but not on T and B lymphocytes. The protein specifically binds the lymphotoxin membrane form (a complex of lymphotoxin-alpha and lymphotoxin-beta). The encoded protein and its ligand play a role in the development and organization of lymphoid tissue and transformed cells. Activation of the encoded protein can trigger apoptosis. [provided by RefSeq]

Other Designations: TNFR superfamily, member 3,lymphotoxin B receptor,lymphotoxin beta receptor,tumor necrosis factor C receptor,tumor necrosis factor receptor superfamily, member 3
