MAGEA4 (Human) Matched Antibody Pair

Catalog # : H00004103-AP22

規格 : [1 Set]

[List All](#)

Specification

Product Description: This antibody pair set comes with matched antibody pair to detect and quantify protein level of human MAGEA4.

Reactivity: Human

Quality Control Testing: Standard curve using recombinant protein (H00004103-P01) as an analyte.

Sandwich ELISA detection sensitivity ranging from 0.1 ng/ml to 100 ng/ml.

Supplied Product: Antibody pair set content:
 1. Capture antibody: rabbit MaxPab® affinity purified polyclonal anti-MAGEA4 (100 ug)
 2. Detection antibody: mouse purified polyclonal anti-MAGEA4 (20 ug)
 *Reagents are sufficient for at least 1-2 x 96 well plates using recommended protocols.

Storage Instruction: Store reagents of the antibody pair set at -20°C or lower. Please aliquot to avoid repeated freeze thaw cycle. Reagents should be returned to -20°C storage immediately after use.

Gene Information

Entrez GeneID: [4103](#)

Gene Name: MAGEA4

Gene Alias: MAGE-41, MAGE-X2, MAGE4, MAGE4A, MAGE4B, MGC21336

Gene Description: melanoma antigen family A, 4

Omim ID: [300175](#)

Gene Ontology: [Hyperlink](#)

Gene Summary: This gene is a member of the MAGEA gene family. The members of this family encode proteins with 50 to 80% sequence identity to each other. The promoters and first exons of the MAGEA genes show considerable variability, suggesting that the existence of this gene family enables the same function to be expressed under different transcriptional controls. The MAGEA genes are clustered at chromosomal location Xq28. They have been implicated in some hereditary disorders, such as dyskeratosis congenita. At least four variants encoding the same protein have been found for this gene. [provided by RefSeq]

Other Designations: OTTHUMP00000025889,OTTHUMP00000025890,melanoma-associated antigen 4
