MAGEA9 (Human) Matched Antibody Pair

Catalog # : H00004108-AP51

規格 : [1 Set]

[List All](#)

Specification

Product Description: This antibody pair set comes with matched antibody pair to detect and quantify protein level of human MAGEA9.

Reactivity: Human

Quality Control Testing: Standard curve using MAGEA9 293T overexpression lysate (non-denatured) as an analyte.

Sandwich ELISA detection sensitivity ranging from approximately 729x to 3x dilution of the MAGEA9 293T overexpression lysate (non-denatured).

Supplied Product: Antibody pair set content:
 1. Capture antibody: mouse monoclonal anti-MAGEA9 (100 ug)
 2. Detection antibody: rabbit purified polyclonal anti-MAGEA9 (50 ug)
 *Reagents are sufficient for at least 3-5 x 96 well plates using recommended protocols.

Storage Instruction: Store reagents of the antibody pair set at -20°C or lower. Please aliquot to avoid repeated freeze thaw cycle. Reagents should be returned to -20°C storage immediately after use.

Gene Information

Entrez GeneID: [4108](#)

Gene Name: MAGEA9

Gene Alias: MAGE9,MGC8421

Gene Description: melanoma antigen family A, 9

Omim ID: [300342](#)

Gene Ontology: [Hyperlink](#)

Gene Summary: This gene is a member of the MAGEA gene family. The members of this family encode proteins with 50 to 80% sequence identity to each other. The promoters and first exons of the MAGEA genes show considerable variability, suggesting that the existence of this gene family enables the same function to be expressed under different transcriptional controls. The MAGEA genes are clustered at chromosomal location Xq28. They have been implicated in some hereditary disorders, such as dyskeratosis congenita. [provided by RefSeq]

Other Designations: MAGE-9 antigen, OTTHUMP00000024214, melanoma-associated antigen 9
