MCC (Human) Matched Antibody Pair

Catalog # : H00004163-AP51

規格 : [1 Set]

[List All](#)

Specification

Product Description: This antibody pair set comes with matched antibody pair to detect and quantify protein level of human MCC.

Reactivity: Human

Quality Control Testing: Standard curve using MCC 293T overexpression lysate (non-denatured) as an analyte.

Sandwich ELISA detection sensitivity ranging from approximately 729x to 3x dilution of the MCC 293T overexpression lysate (non-denatured).

Supplied Product: Antibody pair set content:
 1. Capture antibody: mouse monoclonal anti-MCC (100 ug)
 2. Detection antibody: rabbit purified polyclonal anti-MCC (50 ug)
 *Reagents are sufficient for at least 3-5 x 96 well plates using recommended protocols.

Storage Instruction: Store reagents of the antibody pair set at -20°C or lower. Please aliquot to avoid repeated freeze thaw cycle. Reagents should be returned to -20°C storage immediately after use.

Gene Information

Entrez GeneID: [4163](#)

Gene Name: MCC

Gene Alias: DKFZp762O1615, FLJ38893, FLJ46755, MCC1

Gene Description: mutated in colorectal cancers

Omim ID: [159350](#)

Gene Ontology: [Hyperlink](#)

Application Image

ELISA Pair (Transfected lysate)

Gene Summary: This gene is a candidate colorectal tumor suppressor gene that is thought to negatively regulate cell cycle progression. The orthologous gene in the mouse expresses a phosphoprotein associated with the plasma membrane and membrane organelles, and overexpression of the mouse protein inhibits entry into S phase. Multiple transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq]
