Datasheet

NEFH (Human) Recombinant Protein (Q01)

Catalog Number: H00004744-Q01

Regulation Status: For research use only (RUO)

Product Description: Human NEFH partial ORF (NP_066554, 263 a.a. - 363 a.a.) recombinant protein with GST-tag at N-terminal.

Sequence:

LKCDVTSALREIRAQLEGHAVQSTLQSEEWFRVRLDR
LSEAAKVNTDAMRSAQEEITEYRRQLQARTTELEALKS
TKDSLQRSELEDRHQADIASYQEA

Host: Wheat Germ (in vitro)

Theoretical MW (kDa): 36.85

Applications: AP, Array, ELISA, WB-Re
(See our web site product page for detailed applications information)

Protocols: See our web site at
<http://www.abnova.com/support/protocols.asp> or product page for detailed protocols

Preparation Method: [in vitro wheat germ expression system](#)

Purification: Glutathione Sepharose 4 Fast Flow

Storage Buffer: 50 mM Tris-HCl, 10 mM reduced Glutathione, pH=8.0 in the elution buffer.

Storage Instruction: Store at -80°C. Aliquot to avoid repeated freezing and thawing.

Entrez GeneID: 4744

Gene Symbol: NEFH

Gene Alias: NFH

Gene Summary: Neurofilaments are type IV intermediate filament heteropolymers composed of light, medium, and heavy chains. Neurofilaments comprise the axoskeleton and functionally maintain neuronal caliber. They may also play a role in intracellular transport to

axons and dendrites. This gene encodes the heavy neurofilament protein. This protein is commonly used as a biomarker of neuronal damage and susceptibility to amyotrophic lateral sclerosis (ALS) has been associated with mutations in this gene. [provided by RefSeq]
