NFYB Pre-design Chimera RNAi

Catalog # : H00004801-R01

規格 : [10 nmol] [20 nmol]

List All

Specification

Product Description: Homo sapiens nuclear transcription factor Y, beta (NFYB), mRNA.

Reactivity: Human

Supplied Product: DEPC water

Target Refseq: NM_006166

Storage Instruction: Store at -20°C, do not exceed 4 - 5 freeze-thaw cycles to ensure product integrity.

Note: Position of the Chimera RNAi.

Application Image

RNAi Knockdown

Applications

RNAi Knockdown

Gene Information

Entrez GeneID: [4801](#)

Gene Name: NFYB

Gene Alias: CBF-A,CBF-B,HAP3,NF-YB

Gene nuclear transcription factor Y, beta

Description:

Omim ID: [189904](#)

Gene Ontology: [Hyperlink](#)

Gene Summary: The protein encoded by this gene is one subunit of a trimeric complex, forming a highly conserved transcription factor that binds with high specificity to CCAAT motifs in the promoter regions in a variety of genes. This gene product, subunit B, forms a tight dimer with the C subunit, a prerequisite for subunit A association. The resulting trimer binds to DNA with high specificity and affinity. Subunits B and C each contain a histone-like motif. Observation of the histone nature of these subunits is supported by two types of evidence; protein sequence alignments and experiments with mutants. [provided by RefSeq]

Other Designations: CCAAT-binding transcription factor subunit A, Transcription factor NF-Y, B subunit
