NRF1 Pre-design Chimera RNAi

Catalog # : H00004899-R01

規格 : [10 nmol] [20 nmol]

List All

Specification

Product Description: Homo sapiens nuclear respiratory factor 1 (NRF1), mRNA.

Reactivity: Human

Supplied Product: DEPC water

Target Refseq: NM_005011

Storage Instruction: Store at -20°C, do not exceed 4 - 5 freeze-thaw cycles to ensure product integrity.

Note: Position of the Chimera RNAi.

Application Image

RNAi Knockdown

Applications

RNAi Knockdown

Gene Information

Entrez GeneID: 4899

Gene Name: NRF1

Gene Alias: ALPHA-PAL

Gene nuclear respiratory factor 1

Description:

Omim ID: [600879](#)

Gene Ontology: [Hyperlink](#)

Gene Summary: This gene encodes a protein that homodimerizes and functions as a transcription factor which activates the expression of some key metabolic genes regulating cellular growth and nuclear genes required for respiration, heme biosynthesis, and mitochondrial DNA transcription and replication. The protein has also been associated with the regulation of neurite outgrowth. Alternate transcriptional splice variants, which encode the same protein, have been characterized. Additional variants encoding different protein isoforms have been described but they have not been fully characterized. Confusion has occurred in bibliographic databases due to the shared symbol of NRF1 for this gene and for "nuclear factor (erythroid-derived 2)-like 1" which has an official symbol of NFE2L1. [provided by RefSeq]

Other Designations: OTTHUMP00000184912,alpha palindromic-binding protein
