Datasheet

NTF5 (Human) Recombinant Protein (Q01)

Catalog Number: H00004909-Q01

Regulation Status: For research use only (RUO)

Product Description: Human NTF5 partial ORF (NP_006170, 111 a.a. - 209 a.a.) recombinant protein with GST-tag at N-terminal.

Sequence:

VDLRGREVEVLGEVPAAGGSPLRQYFFETRCKADNAE
EGGPGAGGGGCRGVDRRHVWSECKAKQSYVRALTA
DAQGRVGRWIRIDTACVCTLLSRTGR

Host: Wheat Germ (in vitro)

Theoretical MW (kDa): 36.63

Applications: AP, Array, ELISA, WB-Re
(See our web site product page for detailed applications information)

Protocols: See our web site at
<http://www.abnova.com/support/protocols.asp> or product page for detailed protocols

Preparation Method: [in vitro wheat germ expression system](#)

Purification: Glutathione Sepharose 4 Fast Flow

Storage Buffer: 50 mM Tris-HCl, 10 mM reduced Glutathione, pH=8.0 in the elution buffer.

Storage Instruction: Store at -80°C. Aliquot to avoid repeated freezing and thawing.

Entrez GeneID: 4909

Gene Symbol: NTF4

Gene Alias: NT-4/5, NT4, NT5, NTF5

Gene Summary: This gene is a member of a family of neurotrophic factors, neurotrophins, that control survival and differentiation of mammalian neurons. The expression of this gene is ubiquitous and less influenced by environmental signals. While knock-outs of other

neurotrophins including nerve growth factor, brain-derived neurotrophic factor, and neurotrophin 3 prove lethal during early postnatal development, NTF5-deficient mice only show minor cellular deficits and develop normally to adulthood. [provided by RefSeq]
