Entrez GeneID: 5589

Gene Symbol: PRKCSH

Gene Alias: AGE-R2, G19P1, PCLD, PLD1

Gene Summary: This gene encodes the beta-subunit of

glucosidase II, an N-linked glycan-processing enzyme in the endoplasmic reticulum (ER). This protein is an acidic phospho-protein known to be a substrate for protein kinase C. Mutations in this gene have been associated with the autosomal dominant polycystic liver disease (PCLD). Alternatively spliced transcript variants encoding distinct isoforms have been observed.
