PROC (Human) IP-WB Antibody Pair

Catalog # : H00005624-PW1

規格 : [1 Set]

[List All](#)

Specification

Product Description: This IP-WB antibody pair set comes with one antibody for immunoprecipitation and another to detect the precipitated protein in western blot.

Reactivity: Human

Quality Control Testing: Immunoprecipitation-Western Blot (IP-WB)

Immunoprecipitation of PROC transfected lysate using mouse monoclonal anti-PROC and Protein A Magnetic Bead ([U0007](#)), and immunoblotted with rabbit polyclonal anti-PROC.

Supplied Product: Antibody pair set content:
1. Antibody pair for IP: mouse monoclonal anti-PROC (300 ug)
2. Antibody pair for WB: rabbit polyclonal anti-PROC (50 ul)

Storage Instruction: Store reagents of the antibody pair set at -20°C or lower. Please aliquot to avoid repeated freeze thaw cycle. Reagents should be returned to -20°C storage immediately after use.

Gene Information

Entrez GeneID: [5624](#)

Gene Name: PROC

Gene Alias: PC,PROC1

Gene Description: protein C (inactivator of coagulation factors Va and VIIIa)

Omim ID: [176860](#)

Gene Ontology: [Hyperlink](#)

Application Image

Immunoprecipitation-Western Blot

Gene Summary: The PROC gene encodes protein C (EC 3.4.21.69), a vitamin K-dependent plasma glycoprotein that is a key component of the anticoagulant system. Protein C is cleaved to its activated form, 'activated protein C' (APC) on endothelial cells by the thrombin-thrombomodulin complex (MIM 176930; MIM 188040) and then acts as a serine protease to degrade the activated forms of coagulation factors V (F5; MIM 612309) and VIII (F8; see MIM 306700). Protein S (PROS1; MIM 176880), also a vitamin K-dependent plasma protein, functions as a cofactor to activated protein C.[supplied by OMIM
