Entrez GeneID: 5756

Gene Symbol: TWF1

Gene Alias: A6, MGC23788, MGC41876, PTK9

Gene Summary: This gene encodes twinfilin, an actin

monomer-binding protein conserved from yeast to mammals. Studies of the mouse counterpart suggest that this protein may be an actin monomer-binding protein, and its localization to cortical G-actin-rich structures may be regulated by the small GTPase RAC1. [provided by RefSeq]
