Gene Information

Entrez GeneID: [5950](#)

Gene Name: RBP4

Gene Alias: -

Gene Description: retinol binding protein 4, plasma

Omim ID: [180250](#)

Gene Ontology: [Hyperlink](#)

Gene Summary: This protein belongs to the lipocalin family and is the specific carrier for

retinol (vitamin A alcohol) in the blood. It delivers retinol from the liver stores to the peripheral tissues. In plasma, the RBP-retinol complex interacts with transthyretin which prevents its loss by filtration through the kidney glomeruli. A deficiency of vitamin A blocks secretion of the binding protein posttranslationally and results in defective delivery and supply to the epidermal cells. [provided by RefSeq
