RPS14 polyclonal antibody (A02)

Catalog # : H00006208-A02

規格 : [50 uL]

List All

Specification

Product Description: Mouse polyclonal antibody raised against a partial recombinant RPS14.

Immunogen: RPS14 (NP_005608, 52 a.a. ~ 150 a.a) partial recombinant protein with GST tag.

Sequence: TICRVTGGMKVKADRDESSPYAAMLAAQDVAQRCKELGITALHIKLRATG
GNRTKTPGPGAQSALRALARSGMKIGRIEDVTPIPSDSTRRKGGRRGR

Host: Mouse

Reactivity: Human

Quality Control Testing: Antibody Reactive Against Recombinant Protein.

Western Blot detection against Immunogen (37 KDa) .

Storage Buffer: 50 % glycerol

Storage Instruction: Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.

Gene Name: RPS14

Gene Alias: EMTB

Gene ribosomal protein S14

Description:

Omim ID: [130620](#)

Gene Ontology: [Hyperlink](#)

Gene Summary: Ribosomes, the organelles that catalyze protein synthesis, consist of a small 40S subunit and a large 60S subunit. Together these subunits are composed of 4 RNA species and approximately 80 structurally distinct proteins. This gene encodes a ribosomal protein that is a component of the 40S subunit. The protein belongs to the S11P family of ribosomal proteins. It is located in the cytoplasm. Transcript variants utilizing alternative transcription initiation sites have been described in the literature. As is typical for genes encoding ribosomal proteins, there are multiple processed pseudogenes of this gene dispersed through the genome. In Chinese hamster ovary cells, mutations in this gene can lead to resistance to emetine, a protein synthesis inhibitor. Multiple alternatively spliced transcript variants encoding the same protein have been found for this gene. [provided by RefSeq]

Other 40S ribosomal protein S14,emetine resistance
