Datasheet

RXRA monoclonal antibody (M03), clone 4B5

Catalog Number: H00006256-M03

Regulatory Status: For research use only (RUO)

Product Description: Mouse monoclonal antibody raised against a full length recombinant RXRA.

Clone Name: 4B5

Immunogen: RXRA (AAH07925, 1 a.a. ~ 165 a.a) full-length recombinant protein with GST tag. MW of the GST tag alone is 26 KDa.

Sequence:

```

Host: Mouse

Reactivity: Human

Applications: ELISA, IP, WB-Re
(See our web site product page for detailed applications information)

Protocols: See our web site at <http://www.abnova.com/support/protocols.asp> or product page for detailed protocols

Isotype: IgG2a Kappa

Storage Buffer: In 1x PBS, pH 7.4

Storage Instruction: Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.

Entrez GeneID: 6256

Gene Symbol: RXRA

Gene Alias: FLJ00280, FLJ00318, FLJ16020, FLJ16733, MGC102720, NR2B1

Gene Summary: Retinoid X receptors (RXRs) and

retinoic acid receptors (RARs), are nuclear receptors that mediate the biological effects of retinoids by their involvement in retinoic acid-mediated gene activation. These receptors exert their action by binding, as homodimers or heterodimers, to specific sequences in the promoters of target genes and regulating their transcription. The protein encoded by this gene is a member of the steroid and thyroid hormone receptor superfamily of transcriptional regulators. [provided by RefSeq]
