Datasheet

SMARCA3 (Human) Recombinant Protein (Q01)

Catalog Number: H00006596-Q01

Regulation Status: For research use only (RUO)

Product Description: Human SMARCA3 partial ORF (NP_003062, 932 a.a. - 1009 a.a.) recombinant protein with GST-tag at N-terminal.

Sequence:

PAWNPAEDQCFDRCHRLGQKQEVIITKFIVKDSVEEN
MLKIQNKKRELAAGAFGTKKPNADEMKAQKINEIRTLID
L

Host: Wheat Germ (in vitro)

Theoretical MW (kDa): 34.32

Applications: AP, Array, ELISA, WB-Re
(See our web site product page for detailed applications information)

Protocols: See our web site at
<http://www.abnova.com/support/protocols.asp> or product page for detailed protocols

Preparation Method: [in vitro wheat germ expression system](#)

Purification: Glutathione Sepharose 4 Fast Flow

Storage Buffer: 50 mM Tris-HCl, 10 mM reduced Glutathione, pH=8.0 in the elution buffer.

Storage Instruction: Store at -80°C. Aliquot to avoid repeated freezing and thawing.

Entrez GeneID: 6596

Gene Symbol: HLTF

Gene Alias: HIP116, HIP116A, HLTF1, RNF80, SMARCA3, SNF2L3, ZBU1

Gene Summary: This gene encodes a member of the SWI/SNF family. Members of this family have helicase and ATPase activities and are thought to regulate transcription of certain genes by altering the chromatin

structure around those genes. The encoded protein contains a RING finger DNA binding motif. Two transcript variants encoding the same protein have been found for this gene. However, use of an alternative translation start site produces an isoform that is truncated at the N-terminus compared to the full-length protein. [provided by RefSeq]
