Entrez GeneID: 10081

Gene Symbol: PDCD7

Gene Alias: ES18, HES18, MGC22015

Gene Summary: This gene encodes a protein with sequence similarity to a mouse protein originally identified in embryonic stem cells. In mouse T-cell lines, this protein appears to be related to glucocorticoid- and staurine-induced apoptotic pathways, and to be linked to

ceramide-mediated signalling. These observations suggest that this gene product is involved in specific apoptotic processes in T-cells. [provided by RefSeq]
